ESCALATOR
RISER CLEANER

ERC450

FINALLY, PERFECTLY CLEAN ESCALATORS

The ERC450 is the only patented machine
in the world for quick and complete
escalator riser cleaning.

ESCALATOR CLEANER

PATENTED MACHINE

ERC450 ESCALATOR RISER CLEANER

The ERC450 is the **first machine in the world** designed to clean only the risers of any type of escalator. Light, easy to transport, quick, and innovative: these are the characteristics which make this solution from MACH the best solution to remove **any type of dirt from the riser**. Finally making it possible to clean every part of the escalator step, thoroughly and rapidly.

For complete escalator cleaning, it is possible to integrate the ERC450 not only with the **MACH EC520** but also with all the other similar machines on the market. The other significant advantage is that only **one operator** is required to **clean two escalators at the same time**: while the EC520 can independently clean the treads of one escalator, the operator can concentrate on cleaning the risers of the other escalator, simply swapping the positions at the end of the first cleaning cycle. This is a huge advantage in terms of time and investment.

	ERC450
CLEANING PATH	445 mm
SOLUTION TANK	1 L
RECOVERY TANK	1,7 L
BRUSH PRESSURE	8 kg
TOTAL WEIGHT / WEIGHT ONLY MACHINE	85 kg / 23,5 kg
DIMENSIONS trolley (lxwxh)	1.145 x 560 x 813 mm
DIMENSIONS machine (lxwxh)	1.115 x 445 x 615 mm

ORIGINAL PATENT

The ERC450 Escalator Riser Cleaner is the first machine in the world designed to clean only the risers of any type of escalator. It has been patented due to the application of highly innovative technology, and this original solution is available internationally, exclusive to MACH.

APPLICATIONS:

Commercial centers, multistory car parks, subway systems, stations, airports, casinos, hotels and resorts, public and private buildings, supermarkets, theme parks, cruise ships, museums...

INCLUDED ACCESSORIES:

Transport trolley with brakes, 3 batteries and a battery charger, 2 ready to use brushes, a tray to wash the brushes, a drip tray, 2 funnels, a tank for the detergent, a graduated measuring beaker, 2 empty 5-liter tanks (1 to empty the recovery tank and 1 for clean water or premixed cleaning solution).
